<p>Cavanagh, M., et al (2004) <b><i>Navigating through Number and Operations in Prekindergarten-Grade 2</i></b>. Reston, VA: The National Council of Teachers of Mathematics, Inc.  <a href="http://www.nctm.org">www.nctm.org</a>          (ISBN: 0-87353-548-0)</p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Number Sense</i></li> </ul>	<p>This resource includes activities that introduce, develop, and extend the fundamental ideas of number and operations. Activities are divided into the following chapters:</p> <ul style="list-style-type: none"> <li>• Counting, Ordering, and Representing Numbers</li> <li>• Meanings of Operations</li> <li>• Fact Strategies, Estimation, and Computation</li> </ul> <p>Blackline Masters are included.</p>	<p><b><i>Tiered Delivery:</i></b>          Match the grade level resource most appropriate to the readiness level of students. For the third through sixth grade levels of this resource, see “3-5 Mathematics Resources to Extend and Enrich the Core Curriculum Appropriate for High Ability Students.”</p>	<p>K.CA.1;          K.CA.3;          K.CA.4</p> <p>1.CA.1;          1.CA.2;          1.CA.4;          1.CA.6</p> <p>2.CA.1;          2.CA.2;          2.CA.5;          2.CA.6</p>	<p>PS.1; PS.2;          PS.3; PS.4;          PS.5; PS.6;          PS.7; PS.8</p>
<p>Christensen, E. (2009) <b><i>Coin Clues: Logic Puzzles that Reinforce Coin Values and Strengthen Math Skills (Level A)</i></b>. MindWare Holdings, Inc.</p>	<p>This reproducible book contains 108 “coin clues” puzzles. The object of each puzzle is to put coins in a line to match the clues. The puzzles use pennies, nickels,</p>	<p><b><i>Tiered Delivery:</i></b>          Students needing less of a challenge can be assigned lower-numbered puzzles to solve, and students needing more of a</p>	<p>K.CA.1;          K.CA.2;          K.CA.3;          K.CA.4</p>	<p>PS.1; PS.2;          PS.3; PS.4;          PS.5; PS.6;          PS.7; PS.8</p>

<p><a href="http://www.mindware.com">www.mindware.com</a> (ISBN: 978-1-933054-99-5)</p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Measurement</i></li> <li>• <i>Number Sense</i></li> </ul>	<p>dimes, and quarters. The puzzles get progressively more challenging throughout the book and help students develop coin recognition, money sense, logic, sequencing, and reasoning skills. These puzzles are ideal for independent task time or for partner problem solving. It is recommended that real coins be available for students to use in solving the puzzles.</p>	<p>challenge can be assigned higher-numbered puzzles to solve.</p> <p><b><i>Self-Pacing:</i></b> All 108 puzzles can be stapled into a book and students can progress through the puzzles at their own pace working through as many as they are able.</p> <p><b><i>Choice:</i></b> Provide students all puzzles (i.e., laminated copies) and allow them to choose which puzzles they would like to complete. Explain to students that the lower the number, the easier the puzzle and the higher the number, the more difficult the puzzle.</p>	<p>1.CA.1; 1.CA.2; 1.CA.4; 1.CA.5; 1.CA.6;</p> <p>2.CA.1; 2.CA.2; 2.CA.6</p>	
<p>Cook, M. (2008) <b><i>Count &amp; Place: Sides and Shapes.</i></b> Balboa Island, CA: Marcy Cook Math. <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Geometry</i></li> <li>• <i>Number Sense</i></li> </ul>	<p>In the third section of this resource, “Show the Number with Pattern Blocks,” students use the relationship between pattern blocks and the number each represents (triangle=1; rhombus=2; trapezoid=3; hexagon=6) to “build” each of the numbers from 4 – 19 in four</p>	<p><b><i>Tiered Delivery:</i></b> Students needing less of a challenge can “build” lower-value numbers with fewer possible combination solutions, and students needing more of a challenge can “build” higher-value numbers with a greater number of possible combination solutions.</p>	<p>K.CA.1; K.CA.2; K.CA.3; K.CA.4</p> <p>1.CA.1; 1.CA.2; 1.CA.3; 1.CA.4;</p>	<p>PS.1; P.S.2; P.S.4; P.S.5; P.S.6; P.S.7; P.S.8</p>

	<p>different ways.</p> <p>Example:  8 = hexagon+rhombus  8 = hexagon+2 triangles  8 = 4 blue rhombi  8 = 8 triangles</p> <p>A tracking sheet is included to keep track of task completion progress.</p>	<p><b>Self-Pacing:</b>  Allow students to complete the “Show the Number with Pattern Blocks” tasks at their own pace, keeping track of their progress and moving through the numbers as far as they are able.</p> <p><b>Choice:</b>  Provide students all numbers and allow them to choose the numbers they would like to “build.”</p> <p><b>Extend:</b>  Extend the activity by asking students to “build” numbers up to 100 by stacking groups of pattern blocks.</p>	1.CA.6  2.CA.1; 2.CA.2; 2.CA.3; 2.CA.6	
<p>Cook, M. (1982) <b><i>Dealing with Dominoes</i></b>. Balboa Island, CA: Marcy Cook Math.  <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Number Sense</i></li> </ul>	<p>This resource provides a variety of activities that use double six sets or double nine sets of dominoes. The activities focus on the following areas:</p> <ul style="list-style-type: none"> <li>• Early Number Concepts</li> <li>• Basic Addition Facts</li> <li>• Basic Subtraction Facts</li> </ul>	<p><b>Flexible Grouping:</b>  Arrange students in like-ability partners or small groups to work on appropriately leveled domino-placing activities.</p>	K.CA.1; K.CA.2; K.CA.3; K.CA.4  1.CA.1; 1.CA.2; 1.CA.3;	PS.1; PS.2; PS.3; PS.4; PS.5; PS.6; PS.7; PS.8

	<ul style="list-style-type: none"> <li>• Place Value and Regrouping</li> <li>• Basic Multiplication Facts</li> <li>• Basic Division Facts</li> <li>• Common Fractions</li> </ul> <p>Because the activities are so varied, this resource is appropriate for grades K-3 and beyond.</p>		1.CA.4; 1.CA.5; 1.CA.6  2.CA.1; 2.CA.2; 2.CA.6	
<p>Cook, M. (1992) <b>Duo Do Dominoes</b>. Balboa Island, CA: Marcy Cook Math.  <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Number Sense</i></li> </ul>	<p>This resource provides two levels (“A” &amp; “B”) of domino-placing activities, each level offering 20 challenges. Students use one set of double six dominoes to complete mathematical challenges involving addition, greater than and less than, and equalities. Level “B” adds the challenge of domino-placing rules, including patterns of descending order, ascending order, and consecutive order, as well as requiring addends that equal larger sums. A tracking sheet is included to keep track of task completion progress. This is an excellent resource for like-ability partner problem solving and also works well for</p>	<p><b><i>Tiered Delivery:</i></b>  Partners/Individuals needing less of a challenge can solve challenges from Level “A.”  Partners/Individuals needing more of a challenge can solve challenges from Level “B.”</p> <p><b><i>Self-Pacing:</i></b>  Allow like-ability partners or individuals to complete the “Level A” or “Level B” challenges at their own pace, keeping track of their progress and moving through the challenges as far as they are able.</p> <p><b><i>Choice:</i></b>  Provide students all challenges (i.e., laminated copies) and allow</p>	K.CA.1; K.CA.2; K.CA.3; K.CA.4  1.CA.1; 1.CA.2; 1.CA.4; 1.CA.6  2.CA.1; 2.CA.2; 2.CA.6	PS.1; PS.2; PS.3; PS.4; PS.5; PS.6; PS.7; PS.8

	independent task time.	them to choose which ones they would like to complete. Explain to students that “Level A” is less challenging and “Level B” is more challenging.		
<p>Cook, M. (2001) <b>Money Logic</b>. Balboa Island, CA: Marcy Cook Math.  <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p>Also found in:</p> <ul style="list-style-type: none"> <li>• <i>Measurement</i></li> <li>• <i>Number Sense</i></li> </ul>	<p>This resource provides clues for students to listen to and/or read which challenge them to place coins in proper numerical positions. The resource is divided into sections where students use 3 designated coins, 4 designated coins, 5 designated coins, and 6 designated coins from a set of 12 coins total, up to 2 of each: penny, nickel, dime, quarter, half-dollar, and dollar. Students develop money sense and logical reasoning. These activities are ideal for independent task time, partner problem solving, or whole-class involvement. It is recommended that real coins be available for students to use in solving the activities.</p>	<p><b>Tiered Delivery:</b>  Students needing less of a challenge can be assigned 3-coin challenges, and students needing more of a challenge can be assigned 4-, 5-, or 6-coin challenges.</p>	<p>K.CA.1;  K.CA.2;  K.CA.3;  K.CA.4</p> <p>1.CA.1;  1.CA.2;  1.CA.3;  1.CA.4;  1.CA.5;  1.CA.6</p> <p>2.CA.1;  2.CA.2;  2.CA.6</p>	<p>PS.1; PS.2;  PS.3; PS.4;  PS.5; PS.6;  PS.7; PS.8</p>
Cook, M. (2011) <b>Scavenger</b>	This resource provides 30	<b>Flexible Grouping:</b>	K.CA.1;	PS.1; PS.2;

<p><b>Hunts for Primary Thinkers.</b> Balboa Island, CA: Marcy Cook Math. <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Measurement</i></li> <li>• <i>Number Sense</i></li> </ul>	<p>activities in which students match 12 answers to 12 problems. Students are required to do “double thinking” because the “answer” may be presented in a different way. Some solutions “have to be,” and some have more than one possibility. The activities focus on the following concepts:</p> <ul style="list-style-type: none"> <li>• Right After</li> <li>• Right Before</li> <li>• More Than</li> <li>• Less Than</li> <li>• Between</li> <li>• Greater Than/Less Than</li> <li>• Numbers in the Real World</li> <li>• Addition Facts</li> <li>• Subtraction Facts</li> <li>• Money</li> <li>• Half of</li> <li>• 2-Digit Numbers/Place Value</li> <li>• Line Segments</li> <li>• Clocks: Time</li> <li>• Word Problems</li> <li>• Reasonable Numbers</li> </ul> <p>A tracking sheet is included. This resource is ideal for independent task time or partner problem</p>	<p>Assign like-ability partners to work through the Scavenger Hunts.</p> <p><b><i>Self-Pacing:</i></b> Individuals or like-ability partners can progress through the Scavenger Hunts at their own pace, keeping track of their progress and moving through the activities as far as they are able.</p>	<p>K.CA.2; K.CA.3; K.CA.4</p> <p>1.CA.1; 1.CA.2; 1.CA.6</p> <p>2.CA.6</p>	<p>PS.3; PS.4; PS.5; PS.6; PS.7; PS.8</p>

	solving.			
<p>Cook, M. (1994) <b><i>Shapes &amp; Logic: Young Geometry.</i></b>  Balboa Island, CA: Marcy Cook Math.  <a href="http://www.marcycookmath.com">www.marcycookmath.com</a>  Also found in:</p> <ul style="list-style-type: none"> <li>• <i>Geometry</i></li> <li>• <i>Reasoning, Logic, Problem Solving, Visual Spatial, and Strategic Thinking</i></li> </ul>	<p>In the third section of this resource, students use pattern blocks to create designs worth specified values when the triangle=1, the rhombus=2, the hexagon=3, and the hexagon=6. The build-a-number activities are broken down into the following three categories:</p> <ul style="list-style-type: none"> <li>• Different ways to make a number</li> <li>• Different number of blocks (least blocks, most blocks, all possible numbers of blocks)</li> <li>• Different number of colors (only 1 color, exactly 2 colors, exactly 3 colors, all 4 colors)</li> </ul> <p>This resource is ideal for independent task time or partner problem solving.</p>	<p><b><i>Tiered Delivery:</i></b>  The activities in each section of this resource are progressively more difficult. Match the activities assigned to the readiness level of the students.</p> <p><b><i>Choice:</i></b>  Provide students all activities (i.e., laminated copies) and allow them to choose which ones they would like to complete.</p> <p><b><i>Extend:</i></b>  For students needing an extra challenge, use the three category ideas in this section to assign the building of three-digit numbers by instructing students to stack pattern blocks. For example, a stack of 6 hexagons=36. For solution recording purposes, the shape can be traced and the number indicating the stack height can be written inside the shape tracing.</p>	<p>K.CA.1;  K.CA.2;  K.CA.3;  K.CA.4</p> <p>1.CA.1;  1.CA.2;  1.CA.4;  *1.CA.5;  1.CA.6</p> <p>*2.CA.1;  *2.CA.2;  2.CA.6</p> <p>* Applies to “Extend” implementation.</p>	<p>PS.1; PS.2;  PS.3; PS.4;  PS.5; PS.6;  PS.7; PS.8</p>

<p>Cook, M. (1996) <b><i>Skillboard Math</i></b>. Balboa Island, CA: Marcy Cook Math.  <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><i>Also found in:</i></p> <ul style="list-style-type: none"> <li>• <i>Measurement</i></li> </ul>	<p>Student partners use verbal directives and tiles numbered 0-9 to match specified numbers with number representations on skillboards. At the end of each activity, one of the digits will not be requested and will be held high in the air. This resource provides for children an opportunity to see the numbers 0-9 represented in a variety of ways, which develops number sense, while also developing math vocabulary and cooperation. Partners should change skillboards between activities to see different number representations each time. The concepts developed include:</p> <ul style="list-style-type: none"> <li>• Before</li> <li>• After</li> <li>• Between</li> <li>• Before, After, Between Mix</li> <li>• More Than</li> <li>• Less Than</li> <li>• More Than/Less Than Mix</li> <li>• Place value: Tens Place</li> <li>• Place Value: Ones Place</li> <li>• Place Value: Ones and Tens Mixed</li> </ul>	<p><b><i>Flexible Grouping:</i></b>  Assign like-ability partners to work on skillboard completion.</p>	<p>K.CA.1;  K.CA.2;  K.CA.4</p> <p>1.CA.1;  1.CA.2;  1.CA.4;  1.CA.6</p> <p>2.CA.6</p>	<p>PS.1; PS.2;  PS.3; PS.4;  PS.5; PS.6;  PS.7; PS.8</p>
---	---	---	--	--

	<ul style="list-style-type: none"> <li>• Addition Facts</li> <li>• Subtraction Facts</li> <li>• Addition/Subtraction Facts Mixed</li> <li>• Even/Odd Numbers</li> <li>• Money</li> <li>• Time</li> </ul>			
<p>Cook, M. <b>Tile Task Cards.</b> Balboa Island, CA: Marcy Cook Math. <a href="http://www.marcycookmath.com">www.marcycookmath.com</a></p> <p><b>Kindergarten:</b></p> <p><b>a) Count &amp; Add Tiles (2)</b>  <b>b) First Count, Then Add Tiles (1)</b>  <b>c) Plus Tiles (2)</b></p> <p><b>Grade 1:</b></p> <p><b>d) Add An Addend Tiles (2)</b>  <b>e) Add-Sub Combo Tiles (2)</b>  <b>f) Add/Sub To A Target Tiles (2)</b>  <b>g) Balance Basic Addition Fact Tiles (2)</b></p>	<p>Each packet of tiling task cards includes 20 activity cards that require students to reason mathematically. The cards within each set are progressively more difficult. Each title is one of three challenge levels:</p> <p>Level 1 = specific solutions (most or all “have to be”)  Level 2 = some probing  Level 3 = more open ended (opportunities for experimenting and persevering)  Level 3 is a robust challenge.</p> <p>The challenge level for each title is reported in parentheses. Each packet includes a direction card, example problem card, answer sheet, and a tracking sheet. A set of number tiles 0 - 9 is needed for each student/pair of students</p>	<p><b>Self-Pacing:</b> Students can progress through the 20 cards in each set/title at their own pace, keeping track of their progress and moving through the cards as far as they are able.</p> <p><b>Choice:</b> Provide students all 20 cards in a set/title. Allow them to choose a certain number of cards they would like to complete, explaining that the cards from number 1 to 20 are progressively more difficult.</p>	<p><b>K.CA.1</b> = a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, r, s, t, u, v</p> <p><b>K.CA.2</b>= a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, r, s, t, u, v</p> <p><b>K.CA.3</b>= a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, r, s, t, u</p> <p><b>K.CA.4</b>= a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, r, s, t, u, v</p>	<p>PS.1; PS.2; PS.3; PS.4; PS.5; PS.6; PS.7; PS.8</p>

<p> <b>h) Balance to 12 Tiles (2)</b>  <b>i) Bear Equation Tiles (2)</b>  <b>j) Bunny Function Tiles (2)</b>  <b>k) Tri Add Tiles (2)</b> </p> <p><b>Grade 2:</b></p> <p> <b>l) Addition Balance Tiles (2)</b>  <b>m) Add &amp; Subtract X &amp; Y Tiles (2)</b>  <b>n) Column Tiles (2)</b>  <b>o) Multi Grid Paper Tiles (2)</b>  <b>p) Multiplication Fact Tiles (2)</b>  <b>q) Place Value Tiles: Whole Numbers (2)</b>  <b>r) Plus-Minus Checker Tiles (3)</b>  <b>s) Positive &amp; Negative Add-Sub Tiles (2)</b>  <b>t) Sum Fun: Tile A Letter (3)</b>  <b>u) Sum Problem Tiles (3)</b>  <b>v) X=Fun Tiles (2)</b> </p> <p> <i>Additional Tile Task Cards titles found in:</i> <ul style="list-style-type: none"> <li>Number Sense</li> </ul> </p>	<p> completing a task card. Tile task cards are ideal for independent task time, partner problem solving, and/or homework activities. Grade levels suggested are only recommendations; the use of titles is flexible between the grade levels depending on the readiness level of students. </p>	<p> <b>K.CA.5=</b> j, m, o, s </p> <p> <b>1.CA.1=</b> c, d, e, f, g, h, i, j, k, l, m, n, o, q, r, s, t, u, v </p> <p> <b>1.CA.2=</b> c, d, e, f, g, h, i, j, q, k, l, m, n, o, r, s, t, u, v </p> <p> <b>1.CA.3=</b> j, q </p> <p> <b>1.CA.4=</b> j, k, l, m, n, o, q, r, t, u </p> <p> <b>1.CA.5=</b> n, o, p, q </p> <p> <b>1.CA.6=</b> a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v </p> <p> <b>1.CA.7=</b> j, o, p, q </p>
